CITIZENS OF THE FUTURE

The Foundation expects our students to be prepared upon graduation to take their place as citizens in their community. We will invest in programs and partnerships that develop the skill sets needed in today's workforce, and offer scholarships and support for their next step in college, trade school or job training.

ENRICHMENT & INNOVATION

The Foundation believes all students need to be challenged in order to expand the possibilities for learning. We will invest in education enrichment for all through innovative teaching methods, creative learning opportunities, and expanded electives and extra-curricular programs.

STUDENTS IN NEED

The Foundation believes that every child should come to school prepared to learn. We will invest in focused assistance for the academically-challenged, and resources and support for the economically-challenged in our community. We believe that raising the bar for one, raises the bar for all.

TECHNOLOGY IN THE CLASSROOM

The Foundation believes that technology drives our global economy and the future of the students in our district. We will invest in the integration of cutting-edge technology in our classrooms through up-to-date teaching tools and instruction in the technological skills of the future.
